## Outstanding results for proof coin blanks.

In a competitive market, the level of quality in the proof coin industry continues to increase. SPALECK systems offer the means to reach high quality standards.

### Centrifugal finishing technology

This technology has been adapted for proof coins, including gold and silver.

The blanks will be treated to produce outstanding homogeneous surfaces and no damage, for proof quality striking.

### SPALECK technology for a better production

- ◆ short cycle times due to high process intensity
- ◆ batch to batch consistency
- ◆ uniform treatment
- ◆ fully automatic control
- ◆ system treatment capability for different blank types and materials
- ◆ total dust-free and spot-free drying with the special textile conveyor concept
- ◆ collecting the burnished proof quality blanks in small convenient batch quantities to be transported to the press room
